2006 October 11th (water) by Mayumi (the Vancouver office)

The sushi flew < with FLUGTAG! ? >

The Canadian beginning "FLUGTAG" was held in Vancouver!

FLUGTAG originally meaning being German, it does, but when you translate into English, FLYING DAY it probably will put out, is.

As in name, the participation group produces the respective unique vehicle, rivals ground coverage.

In Japan it is the conference which adapts, but because in here Canada it was new opening, it seems that from the Canadian all earth the participant gets together in Vancouver town.

The participant to design to the individual, because the vehicle is produced with handmade, the kind of vehicle which it cannot fly clearly (shape of the sushi it has done it probably will complete the vehicle and the like which imitated the airplane there was the ㄩ...) and, expectation.

After all, every team falling disappointingly, it falls in the bay, it is, but in the vehicle and the performance which elaborated each team idea, the audience was exultaion, (^ ^)

Next year, it is the pleasant kind of event where by your stop wanting to participate!
